

Drip Irrigation at Hill East Community Garden (HECG)

-

Memorandum of Understanding

I, _____, HECG gardener, agree to follow the below described stipulations when building and maintaining my plot drip irrigation system: I am responsible for purchasing all drip irrigation supplies and materials for building my drip irrigation stand. I am also responsible for building my own system. My barrel height will not exceed 58 inches measured from the pathway. My barrel structure will be stable and sound.

I will place the barrel in a location in my plot that will minimize the shading of adjacent plots. Excessive shading of adjacent plots may result in my being asked to move or possibly, remove the drip system from my plot. I will not use Hill East Garden's water supply hoses (or attach my own hose to the supply hose) to fill my barrels. I must fill my barrel using watering cans or other manual means. I agree to make sure that I fill the blue common barrels after I drain a large amount of water from it to fill my plot barrel.

I will prepare my barrel at the end of the gardening season for winter storage.

I understand that failure to comply with the stipulations of the Drip Irrigation at HECG - Memorandum of Understanding will result in the loss of drip irrigation privileges. Gardeners in non-compliance will have a two-week period to remove the drip irrigation system; failure to do so could result in revoking garden membership. I also understand that this memorandum of Understanding refers to the current growing season only.
